Application 23866 Permit 16564 License 11192

**ORDER AMENDING THE LICENSE BY ADDING MEASURING DEVICE
REQUIREMENTS, WATER QUALITY OBJECTIVE AND ENDANGERED OR
THREATENED SPECIES TERMS AND BY REVISING THE CONTINUING
AUTHORITY TERM**

WHEREAS:

1. License 11192 was issued to Pool Management, LTD c/o William D. Collins, Jr. on March 29, 1982, pursuant to Application 23866 and was recorded with the County Recorder of Napa County in Volume 1235, Page 405 on March 31, 1982.
2. License 11192 was subsequently assigned to Jerome J. Lohr and Carol W. Lohr on May 7, 1984.
3. The Division of Water Rights (Division) conducted an inspection of the project covered by License 11192 on April 25, 2000. The Division has determined that in order to ensure continued compliance with the terms and conditions of License 11192, the licensee shall maintain monthly records of water diverted under this license.
4. The State Water Resources Control Board (SWRCB) will also add its standard water quality objective term, a revised continuing authority term, and a term to prevent any act which results in the taking of a threatened or endangered species that has been or may be listed under the federal Endangered Species Act and/or the California Endangered Species Act.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The following measuring device and monitoring requirement of the amounts diverted under this license is added as follows:

No water shall be diverted under this license until the licensee installs and maintains an in-line flow meter, acceptable to the Division, that is capable of measuring the instantaneous rate and cumulative amount diverted under this license. Licensee shall maintain a record of the end-of-the-month meter readings and of the days of actual diversion, and shall submit these monthly records with the triennial report of licensee, or whenever requested by the Division.

(0100900)

2. The water quality objectives condition is added as follows:

The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

3. The continuing authority condition is updated to read as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

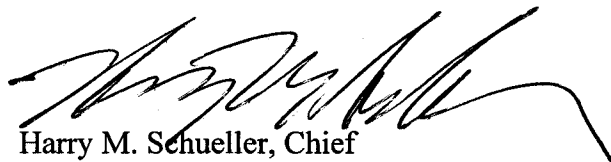

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest; and is necessary to preserve or restore the uses protected by the public trust.

4. An endangered species term is added as follows:

This permit does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (California Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "take" will result from any act authorized under this water right, the permittee shall obtain authorization for an incidental take prior to construction or operation of the project. Permittee shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this permit.
